狂飚 3 HURRICANE 3 [反胶IN]

持久粘性、弧圈相持
Increased tackiness suitable for loop drive

控制/弧圈 Control/Loop	厚度/Thickness 2.15/2.2mm	硬度/Hardness 38/39/40/41
-----------------------	----------------------------	----------------------------

自2000年以来，狂飚3成为大部分中国运动员的不二之选。对于追求控球和弧圈质量的选手来说，即使用中等发力，也能毫不费力地打出强烈旋转和较长的弧线，不仅在中远台，在近台也能发挥快攻和弧圈的威力。狂飚3，粘性更持久，增强40+新材料乒乓球的旋转。

Hurricane 3, with increased tackiness, is suitable for loop drive. Hurricane 3 has been the best choice for almost all the Chinese players since 2000. Hurricane 3 is designed for players who pursue the quality of ball control or have relatively weak attack. The rubber can boost power and produce long arcs, which improves the ball control and exerts fast attack and loop drive close-to-table. Hurricane 3 with increased tackiness, enhances the spin of 40+ Celluloid-Free T.T. balls.

狂飚 8 HURRICANE 8 [反胶IN]

柔弹高粘性胶皮+致密性海绵
Elastic high-stickiness rubber + dense sponge

速度/弧圈 Speed/Loop	厚度/Thickness 2.15/2.2mm	硬度/Hardness 39/40/41
---------------------	----------------------------	-------------------------

韧性和弹性平衡的胶皮配方，中小力量也有高速度；“新型致密性海绵”+“高弹粒子渗透技术”，比传统海绵增加弹性。这款套胶既保留了狂飚系独有的旋转性能和诡异弧线，又显著增加出球速度，发力通透性令人耳目一新。狂飚8，专为增强40+新材料乒乓球的旋转和速度而设计。

The rubber keeps a good balance between flexibility and elasticity. A new high-density sponge with 'MACRO-CELL' & 'High-Elasticity Particle Osmosis technology' helps Hurricane 8 raise the elasticity by 15%. The player can also acquire a high shot speed with weak attack. Hurricane 8 provides unique spin and unpredictable arc and enhances shot speed significantly, which brings a refreshing feeling for offensive players. Hurricane 8 is specially designed to enhance the spin and speed of 40+ Celluloid-Free T.T. balls.

Equipped with 80# soft high-elastic macroporous sponge, is great at "change". Small and medium strength can bring multiple levels of hitting. With its fast deformation recovery, fast speed, and swift changes, it performs well in continuous attack.

狂飚 2 HURRICANE 2 [反胶IN]

一击制胜、力量超群
Decisive blows with outstanding power

快攻/弧圈 Quick-Attack/Loop	厚度/Thickness 2.15/2.2mm	硬度/Hardness 38/39/40
----------------------------	----------------------------	-------------------------

自2000年王励勤夺冠以来，狂飚2力大势沉的风格保持至今。出球速度之快、旋转之强，无出其右，还能保持良好的控球性。台内球弧线低，令对手难以组织起有效进攻。全新狂飚2，粘性更持久，强化40+新材料乒乓球的旋转。

Hurricane 2 is known for its decisive blows with outstanding power. Hurricane 2 has kept the powerful style since Wang liqin won the Championship in 2000. Hurricane 2 can create higher speed and varied spin while maintaining stable control. In addition, it generates strong near-table offensive power to make the ball fly in a low arc which frustrates opponent's defences. Exclusive Hurricane 2, with increased tackiness, enhances the spin of 40+ Celluloid-Free T.T. balls.

天极 2 SKYLINE 2 [反胶IN]

强化控制的天极
Control superior

控制/弧圈 Control/Loop	厚度/Thickness 2.15/2.2mm	硬度/Hardness 38/39/40/41
-----------------------	----------------------------	----------------------------

转或不转，强或弱，微妙的变化，转瞬完成。天极2，带来极富特色的弧圈结合快攻新体验。涩粘结合的胶质具备出色而异于传统中国胶皮的摩擦感，制造出强烈多变化的旋转。独特的胶粒结构和弹性胶质，使力量和速度不断爆发，从而使多变的旋转更稳定、更具威胁。

Spin or not, strong or weak, delicate changes are achieved in a flash. Skyline 2 rubber made with new technique brings fresh experience of loop plus quick-attack play. Astringency-glutinosity colloid provides friction completely different from Chinese traditional rubbers, creating powerful and varied spin. Unique pimple structure and elastic colloid boost stronger power and higher speed so that spins can be varied, stable and threatening.

天极 3 SKYLINE 3 [反胶IN]

强化控制的天极
Control superior

控制/速度 Control/speed	厚度/Thickness 2.15/2.2mm	硬度/Hardness 38/39/40/41
------------------------	----------------------------	----------------------------

快速、持续不断、密不透风的攻击风格。天极3，使弧圈技术体现出更快速的攻击力。追求形变，即使不发力也能保持出球的高速度，快速的形变恢复则能保障连续的拉弧圈能力，令对于处于持续的进攻压力之下。柔韧性和黏性完美调配的胶质，则使快攻时的弧圈动作幅度小而密，细腻而敏锐。

Fast, continual and dense attack. Skyline 3 made with new technology helps arcing tecnology realize better attack performance. Thanks to the rubber's good deformation, the ball can maintain a high speed even with minimun power. Meanwhile its rapid recovery ability from deformation can ensure the continuous arcing ability and put the opponent under continuous offensive pressure. The perfect blend of flexibility and stickiness makes the arcs in fast attack small, dense, delicate and sharp.

天极 3-60 SKYLINE 3-60 [反胶IN]

经典超粘胶皮+全新柔弹海绵
High-stickiness rubber + Soft elastic sponge

控制/弧圈 Control/Loop	厚度/Thickness 2.1mm	硬度/Hardness 35/37
-----------------------	-----------------------	----------------------

经典的天极3，搭配更轻柔、高弹的60号海绵，给击球带来更丰富的层次感。天极3胶皮快速的形变恢复能力，能制造持续、高强度地弧圈进攻；60号海绵在速度和弹性上的卓越性能，使天极3-60在中小发力下也能保持高速度。柔韧的胶皮与柔弹的海绵完美结合，快攻，或弧圈，通过手腕的微小变化就可技术转换，令对手无所适从。从天极3-60能制造出强烈而多变的旋转。在柔弹的海绵支撑下层次分明，弧圈技术的变化更加丰富。粘性胶皮和高弹海绵的组合为使用者带来1+1>2的效果。

Classic Skyline 3, equipped with the soft and elastic 60# sponge, brings a unique sense when hitting. Skyline 3-60 is designed with a unique combination of the sponge and the rubber. It absorbs and responds rapidly on ball contacts, providing excellent elasticity and speed. Such dynamic properties make Skyline 3-60 ideal for continuous and high strength loop attacks with minimun efforts. The soft elastic 60# sponge and pliable rubber is perfect for making fast attacks and subtle technical changes with the wrist, to deceive the opponent. Skyline 3-60 generates strong and varied spins. Supported by soft elastic sponge, the sticky rubber optimizes spin potential. Players using Skyline 3-60 will not be limited to one certain type of loop but have different options of using varied loop techniques. Skyline 3-60 is the optimal combination of classic sticky rubber and elastic sponge.
